

February 20-21, 2023

Virtual Expert Meeting

ROADMAP TO FUTURE-READY EXTRATERRESTRIAL CONSTRUCTION WORKFORCE DEVELOPMENT: TECHNOLOGICAL VISIONS AND NEEDS

Goals:

1. To develop a better understanding of the definition, hierarchy, and categorization of workforce skills in the context of future extraterrestrial construction with a focus on human-robot collaboration tasks.
2. To explore training environments enabled by adopting emerging technologies to make the existing workers become ready for the future frontier.

Who to Attend:

Academic and professional and researchers and practitioners with expertise in extraterrestrial construction, human-robot collaboration, workforce development, and technology in education.

Benefits:

- No registration fee.
- Join a cohort of visionary researchers to collaborate on future proposals and publications.
- Some selected participants will receive an honorarium.
